

Build a Page in Omeka S

1

Start from your administrative dashboard and select the site that you want to add a page to from your "manage sites" quick links. I'm going to add a page to "Sara's Crayfish."

The screenshot shows the 'Admin dashboard' for the 'Digital Collection for LS562'. The left sidebar contains navigation links for 'RESOURCES' (Items, Item sets, Vocabularies, Resource templates) and 'ADMIN' (Users, Modules, Jobs, Settings, Assets). The 'Sites' link in the sidebar is highlighted with a red box. The main content area is divided into two columns: 'Manage resources' and 'Manage sites'. The 'Manage sites' column lists various sites, with 'Sara's Crayfish' highlighted by a red box. An 'Add site' button is located at the bottom right of the 'Manage sites' list.

Add site

Omeka S version 4.1.1 System information User manual Support forums

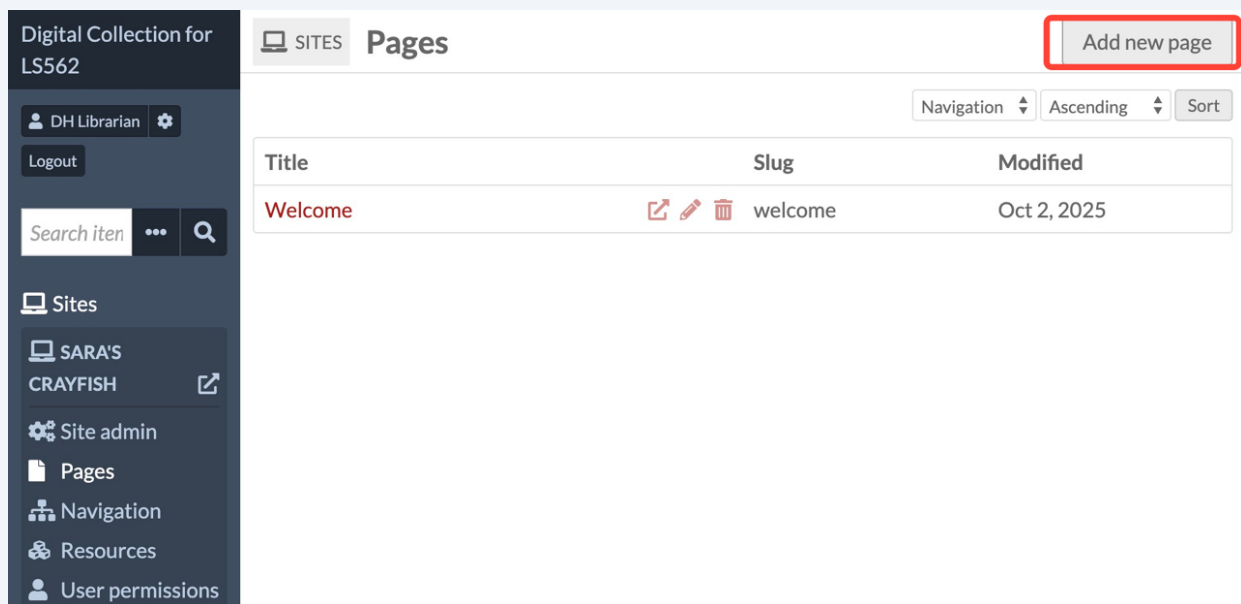

2 When the "sites" menu appears, select the "pages" link.

The screenshot shows the 'Digital Collection for LS562' interface. On the left, a dark sidebar contains a 'SITES' menu with a red box around the 'Pages' link. The main content area is titled 'SITES Sara's Crayfish' and includes 'Edit' and 'View' buttons. Below the title is a 'Back to site list' link. The main content area displays the following information:

URL slug	sara-crayfish
Title	Sara's Crayfish
Theme	default

3 Click "Add new page"

The screenshot shows the 'Digital Collection for LS562' interface with the 'Pages' menu selected. The main content area is titled 'SITES Pages' and includes an 'Add new page' button highlighted with a red box. Below the title are 'Navigation', 'Ascending', and 'Sort' buttons. The main content area displays a table with the following information:

Title	Slug	Modified
Welcome	welcome	Oct 2, 2025

4 Give your page a title and an optional URL slug and make sure to save!

5 I like to start with some base organization and select "Add Block Group." This helps keep things together on your page.

Now you can start adding blocks to your page. This is a two-step process, add the block to your page and then drag it by the three line "hamburger" icon into the Block Group.

The screenshot shows the page editor interface. On the left is a dark sidebar with a 'Logout' button at the top, a search bar, and a menu with categories: 'Sites' (containing 'SARA'S CRAYFISH'), 'Site admin', 'Pages', 'Navigation', 'Resources', 'User permissions', and 'Theme'; 'RESOURCES' (containing 'Items', 'Item sets', and 'Vocabularies'); and 'ADMIN' (containing 'Users'). The main area is titled 'CUTE ZAPPO' and has a 'URL slug' of 'cute-zappo'. Below the title is a 'Layout' section with a 'Normal flow' dropdown and 'Expand all'/'Collapse all' buttons. A 'Page title' block is present with the text 'CUTE ZAPPO'. Below it is a 'Block group' with the instruction 'Drag blocks here to group.' and a red box around it. On the right is a panel with a list of blocks to add, each with a plus icon: 'Asset', 'Browse preview', 'HTML', 'Item with metadata', 'Line break', 'List of pages', 'List of sites', 'Media embed', 'oEmbed', and 'Page date/time'. A red box highlights this entire panel.

7

In my block group, I am adding an HTML block, an assets block. Then I'm adding a browse preview block below, outside of the block group.

The screenshot shows the page editor interface after adding blocks. The 'Block group' now contains an 'Asset' block (with an 'Assets' dropdown and an 'Add asset' button) and an 'HTML' block. Below the 'Block group' is a 'Browse preview' block. The 'Page title' block remains at the top. The right panel shows the list of blocks to add, with 'Browse preview', 'HTML', 'Item with metadata', 'Line break', 'List of pages', 'List of sites', 'Media embed', 'oEmbed', 'Page date/time', 'Page title', and 'Table of contents' visible. A red box highlights the 'Block group' and the 'Browse preview' block, indicating they have been added to the page.

8 You can upload your assets in the process of adding them to your block.

12 Hooray, you did it! Let's see what it looks like!

The screenshot shows the 'CUTE ZAPPO' edit page. A green notification bar at the top states 'Page successfully updated'. The 'Save' button in the top right corner is highlighted with a red box. The page title is 'CUTE ZAPPO' and the URL slug is 'cute-zappo'. The layout is set to 'Normal flow'. The left sidebar shows the user is logged in as 'DH Librarian' and provides a search bar and site navigation options. The right sidebar offers options to 'Add new block' and lists various block types like 'Asset', 'Browse preview', 'HTML', 'Item with metadata', and 'Line break'.

13 Click "View"

This screenshot shows the same 'CUTE ZAPPO' edit page, but the 'View' button in the top right corner is now highlighted with a pink circle. The 'Page successfully updated' message remains. The page content is visible, including the title 'CUTE ZAPPO', the URL slug 'cute-zappo', and the layout 'Normal flow'. The left sidebar is identical to the previous screenshot. The right sidebar shows the 'Add new block' section with a list of block types: 'Asset', 'Browse preview', 'HTML', 'Item with metadata', 'Line break', 'List of pages', 'List of sites', and 'Media embed'. The 'Assets' section is expanded, showing two assets: 'zap_07.png' and 'crayfish clip art.png'.

14 It's simple but cute. Let's see what you can do with your pages!

CUTE ZAPPO

Zappon is such a cute little creature. He has so many appendages and so many little pinchers and he can use more than one pincher independently from the other. When he's tired, he likes to burrow in the gravel of his cave to hide, and he is always interested in eating peas.
